“This new purpose built facility brings together services from several locations around the area. It will enable more people to receive their healthcare locally. We are delighted with the design and appearance of the building.”

*Fran Buxey,
NHS Hampshire
Project Manager*

The 2,790 m² £9 million development of Fareham Community Hospital is providing much needed modern accommodation. The Hospital brings a wide range of community health services together from various locations throughout the Borough.

This state-of-the-art hospital has been designed to compliment the landscape and its surroundings and is easily accessible for the local population. Its contemporary design responds carefully to the clinical and functional requirements of NHS Hampshire. This reflects the modern model of care which it will provide.

The Hospital is environmentally friendly and built from materials from renewable sources; it also complies with modern energy efficiency standards reducing carbon emissions and meets BREEAM excellence standards for healthcare facilities.

Fareham Community Hospital will accommodate existing services from sites in Fareham and Gosport and some acute services from Portsmouth’s Queen Alexandra Hospital within a primary / community care setting. It will also bring together a range of primary healthcare professionals enhancing the delivery of services within the area.

Local residents and patients who have used the new facility all comment on how easy the building is to navigate and how the facilities enhances the level of care they experience. This has been a very positive development by Solent Community Solutions and one which the team are suitably proud.
